Afrobarometer Round 10

Summary of results for South Africa, 2025

Afrobarometer, a nonprofit corporation with headquarters in Ghana, is a pan-African, nonpartisan survey research network that provides reliable data on Africans' experiences and evaluations of democracy, governance, and quality of life. Ten rounds of surveys have been completed in up to 45 countries since 1999. Round 10 surveys (2024/2025) cover 38 countries. Afrobarometer's National Partners conduct face-to-face interviews in the language of the respondent's choice with nationally representative samples.

Regional coordination of National Partners in more than 35 countries is provided by the Ghana Center for Democratic Development (CDD-Ghana), the Institute for Justice and Reconciliation (IJR) in South Africa, the Institute for Development Studies (IDS) at the University of Nairobi in Kenya, and Innovante Recherche en Economie et Gouvernance (IREG) in Benin. Michigan State University (MSU) and the University of Malawi provide technical support to the network.

The Afrobarometer National Partner in South Africa, the Institute for Justice and Reconciliation, interviewed a nationally representative, random, stratified probability sample of 1,600 adult citizens between 28 June and 19 July 2025. A sample of this size yields country-level results with a margin of error of +/-2.5 percentage points at a 95% confidence level. Previous surveys have been conducted in South Africa in 2000, 2002, 2006, 2008, 2011, 2015, 2018, 2021, and 2022. Technical details of the survey, including descriptions of stratification and household selection, translation languages, and related information, can be found in the survey technical information form that follows.

Below is an outline of the survey findings from all the questions posed to respondents. We also present the findings by respondents' gender and place of residence (urban-rural). In addition, responses to all questions in the survey can be disaggregated by age, education, socioeconomic level, and other demographic variables. Visit our free online data analysis facility at <http://afrobarometer.org/online-data-analysis/analyse-online>.

Financial support for Afrobarometer is provided by Sweden via the Swedish International Development Cooperation Agency, the Norwegian Agency for Development Cooperation via the World Bank Think Africa Project, the Mo Ibrahim Foundation, the Open Society Foundations - Africa, Luminata, the Ford Foundation, the William and Flora Hewlett Foundation, the Mastercard Foundation, the David and Lucile Packard Foundation, the Obama Foundation, the Rockefeller Foundation, the European Union Commission, the World Bank Group, the Population Institute, the Centre for International Governance Innovation, the International Development Research Centre (IDRC), the Royal Embassy of Denmark in Uganda/Danida, the Embassy of the Kingdom of the Netherlands in Uganda, and the German Federal Ministry for Economic Cooperation and Development (BMZ) supported by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH.

Technical information form

Universe:	Citizens of South Africa who are 18 years and older
Sample design:	Nationally representative, random, clustered, stratified, multi-stage area probability sample
Stratification:	Region and urban-rural location
Stages:	Primary sampling units (PSUs) (from strata), start points, households, respondents
PSU selection:	Probability proportionate to population size (PPPS)
Cluster size:	4 households per PSU
Household selection:	Randomly selected start points, followed by walk pattern using 5/10 interval
Respondent selection:	Gender quota filled by alternating interviews between men and women; respondents of appropriate gender listed, after which computer randomly selects individual
Weighting:	Weighted to account for individual selection probabilities
Margin of error:	+/-2.5 percentage points at 95% confidence level
Fieldwork by:	Institute for Justice and Reconciliation
Survey languages:	English, Afrikaans, Zulu, Sotho, Tswana, and Xhosa
Main researchers:	Preston Govindasamy and Stephen Ndoma
Outcome rates:	Contact rate: 78.95% Cooperation rate: 61.05% Refusal rate: 14.94% Response rate: 48.19%
Dates of fieldwork:	28 June-19 July 2025
Sample size:	1,600
Sampling frame:	Population data provided by Ariane Neethling, professional statistical consultant at GeoTerralimage. The GTI EA sampling frame was created as an updated version of South African Households, Population and Demographics based on the 2022 national census.
EA substitution rate:	2.75%

Note: All figures in the following tables are percentages, rounded to one decimal place. Due to rounding, columns may not add up to exactly 100.0%. (Please note that Afrobarometer's general practice in most analysis and publications is to report findings rounded to whole numbers.) Readers are reminded that the sample size in South Africa of 1,600 yields a margin of sampling error of +/-2.5 percentage points at a 95% confidence level. A dash ("-") or blank cell indicates that there were no responses in this category. For Questions 1 through 99, weighted frequency distributions are reported.

Note: This presentation of findings does NOT reflect the order in which survey questions were asked during the interview. We have numbered the questions as in the questionnaire but have ordered them by topic. To see the questionnaire, please visit www.afrobarometer.org.

Public services and government performance

See related questions in the sections on “Respondents and their households” (about electricity at the household level) and “Institutions and leaders.”

Services and facilities in the enumeration area

The questions in this section asked Afrobarometer enumerators to record the availability or condition of selected facilities and services in or near each primary sampling unit/enumeration area (PSU/EA). Because these data are captured at the EA level, the sample size is significantly smaller, and the margins of error significantly larger, than for findings captured at the individual or household levels.
